

**INDICATOR SHEET**

1. Indicator name			
Over-aging index			
<b>Last update:</b>	17/01/2023	<b>Version:</b>	1.1

2. Field	
Main Scope	Social
Sub-Scope	Sociodemographic

**3. Definition**

The over-ageing index shows the percentage of people aged 85 and over over the total number of people aged 65 and over. Consult the technical data sheet for more information. The over-ageing index is presented by province and municipalities. Data from municipalities are also disaggregated by sex.

**4. Calculation formula**

$$\frac{\sum n_i}{\sum N_i} \times 100$$

Where:

- i represents the territory
- n are people aged 85 and over
- N are people aged 65 and over.

**5. Reading**

Direct reading of the referenced number. The index indicates the number of people aged 85 and over for every 100 people aged 65 and over in that territory. The highest numbers indicate a higher percentage of people aged 85 and over.

**6. Periodicity**

Annual

**7. Source**
