

INDICATOR SHEET

1. Indicator name

Ratio S80/20

Update date: 17/01/2023 **Version:** 1.3

2. Scope

Main Scope	Social
Sub-Scope	Poverty

3. Definition

It is the ratio between the income of 20% of the population with the highest incomes respect to the income of the 20% of the population with the lowest incomes (the income obtained for the top quintile in relation to that of the lowest quintile).

4. Calculation formula

$$= \frac{Q_{p80}}{Q_{p20}}$$

Where:

- P80 includes the population in the top quintile of the value of income.
- P20 includes the population in the bottom quintile of the value of income.

5. Reading

The Indicator shows inequality in income distribution. Higher values indicate greater inequality. A value of 1 indicates that the top income quintile (people with the highest income) and the bottom quintile (people with the lowest income) have the same income. A value of 2 indicates that people in the top quintile are paid twice as much as people in the bottom quintile.

6. Periodicity

Indicate how often there is information from this indicator.

Annual

7. Font

[INE \(ADRH: Atlas of household income distribution\)](#)

8. Limitations

Geographical Temporary Statistical secrecy

Description of limitations

Limitations in the territorial disaggregation of the indicator by statistical secrecy in localities or sub-areas of each locality where the number of declarants is less than 100.
