

INDICATOR REFERENCE SHEET

1. Indicator name

At-risk-of-poverty rate

Update date:	18/01/2023	Version:	1.2
---------------------	------------	-----------------	-----

2. Ambit

Main area	Social
Sub-area	Poverty

3. Definition

The at-risk-of-poverty rate shows the handful of people in low-income conditions who are below 60% of the median income ¹.

4. Calculation formula

$$= \left(\frac{Population_{60}}{Total\ population} \right) * 100$$

Where:

*Population*₆₀ corresponds to the sum of people whose income is less than 60% of the national average.

5. Reading

Direct reading in percentage.

This percentage is an indirect measure of the poverty of a municipality since it is considered that people living below 60% of the average income of a municipality are in this situation. A higher percentage indicates more people at risk of poverty than the total population.

6. Frequency

Annual ²

7. Source

[INE \(ADRH: Atlas of household income distribution\)](#)

8. Constraints

Geographical	<input type="checkbox"/>	Temporary	<input type="checkbox"/>	Statistical secrecy	<input checked="" type="checkbox"/>
--------------	--------------------------	-----------	--------------------------	---------------------	-------------------------------------

Description of limitations

Limitations in the territorial disaggregation of the indicator by statistical secrecy in localities or sub-areas of each locality where the number of declarants is less than 100.
