

INDICATOR REFERENCE SHEET

1. Indicator number

Extreme poverty risk rate

Fecha actualización: 18/01/2023**Version:**

1.2

2. Àmbito

Main area Social

Sub-area Poverty

3. Definition

The extreme poverty risk rate shows the percentage of people on an income deemed below 40% of the average income¹.

4. Calculation formula

$$= \left(\frac{Población_{40}}{Población\ total} \right) * 100$$

Donde:

- $Población_{40}$ corresponds to the sum of people whose income is less than 40% of the national media.

5. Reading

Direct reading in percent.

This percentage is an indirect measure of poverty in a municipality as people living below 40% of the average income are considered to be in this situation. The higher this percentage, the more people at risk of poverty in this area compared to the total population.

6. FrequencyAnnual²**7. Source**[INE \(ADRH: Atlas de distribución de renta de los hogares\)](#)**8. Constraints**Geographies Storms Statistical secret

Description of constraints

Limitations in the territorial breakdown of the indicator by statistical secrecy in locations or sub-areas of each locality where the number of taxpayers is less than 100.
